

## Interactive training guides: Security and Compliance

Get trained and ready for back-to-school with interactive guides you can use at your own pace. Learn how to use Microsoft admin centers and Windows PowerShell to:

- Configure access and identity policies and enable Office 365 Advanced Threat Protection for Teams: [Teams Security Guide](#)
- Manage and configure Teams policies and settings: [Managing Compliance in Teams](#)

## Quick tip: Windows Update policies you should set now

The Windows Update experience has evolved over the past several years. Make sure you're up-to-speed on policies that can help simplify update management for single user or shared devices used by students and teachers in a school setting.

Our tech community blog provides guidance and insights about policies you should set, and why.

## NEW in Education Insights: Student Support Spotlight

When students are disengaged, learning suffers. You can make a difference.

Give your educators another tool to help them identify areas of concern by enabling student support spotlight.

A recent addition to the Education Insights app, the student spotlight card uses machine learning to monitor digital engagement patterns of an entire class and individuals to let educators know if students are showing potential signs of disengagement.
